## WEDDING TRENDS 2022

---

After the sudden halt locally of traditional weddings in March 2021, and the slow reintroduction of smaller celebrations later in the year, many couples are looking forward to being able to celebrating their big day safely in 2022. We have predicted some of the wedding trends that will take over the local wedding scene this year!

## OUTDOOR CELEBRATIONS

---

There's no surprise that outdoor weddings are becoming the preferred choice for many couples, whether that's through charming garden weddings or idyllic beach ceremonies. Outdoor celebrations allow you to fully customise your wedding decor from the ground up, and typically give you the ability to host a larger guest list. If you're worried about the weather, there are many fabulous marquees available to ensure you stay dry, and party the night away.

## DELICIOUS FOOD

---

With the rise of outdoor weddings, couples are finding their way back to classic buffet catering options. These options include roasts and wet dishes with locally sourced caterers! Each buffet is unique to the couple and adds a safety element to the day for that one person who forgot to mention their food allergy. Your guests are guaranteed to love it because they're literally building their own meal only including on their plate the food items that they enjoy!

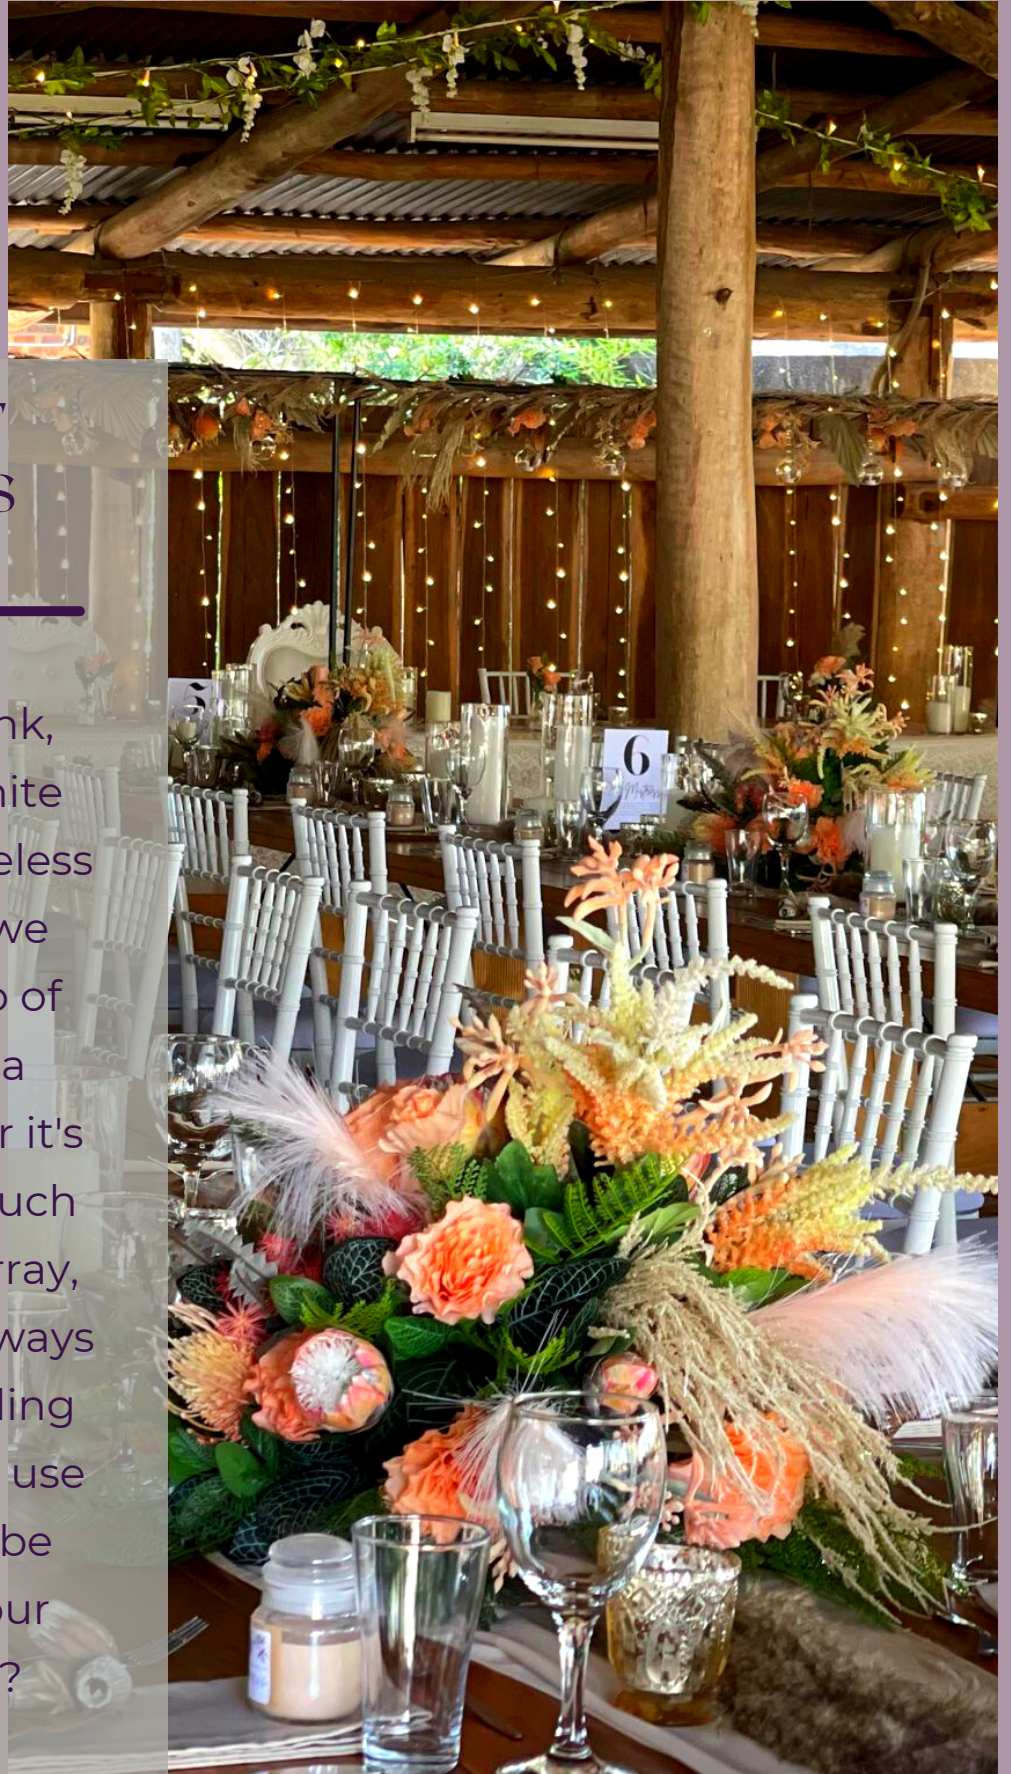

## VIBRANT COLOURS

---

Although blush pink, sage green and white will forever be a timeless wedding palette, we have noticed a pop of colour is making a comeback. Whether it's through a subtle touch or a more vibrant array, couples are finding ways to make their wedding unique through the use of colour. Will you be incorporating colour into your big day?

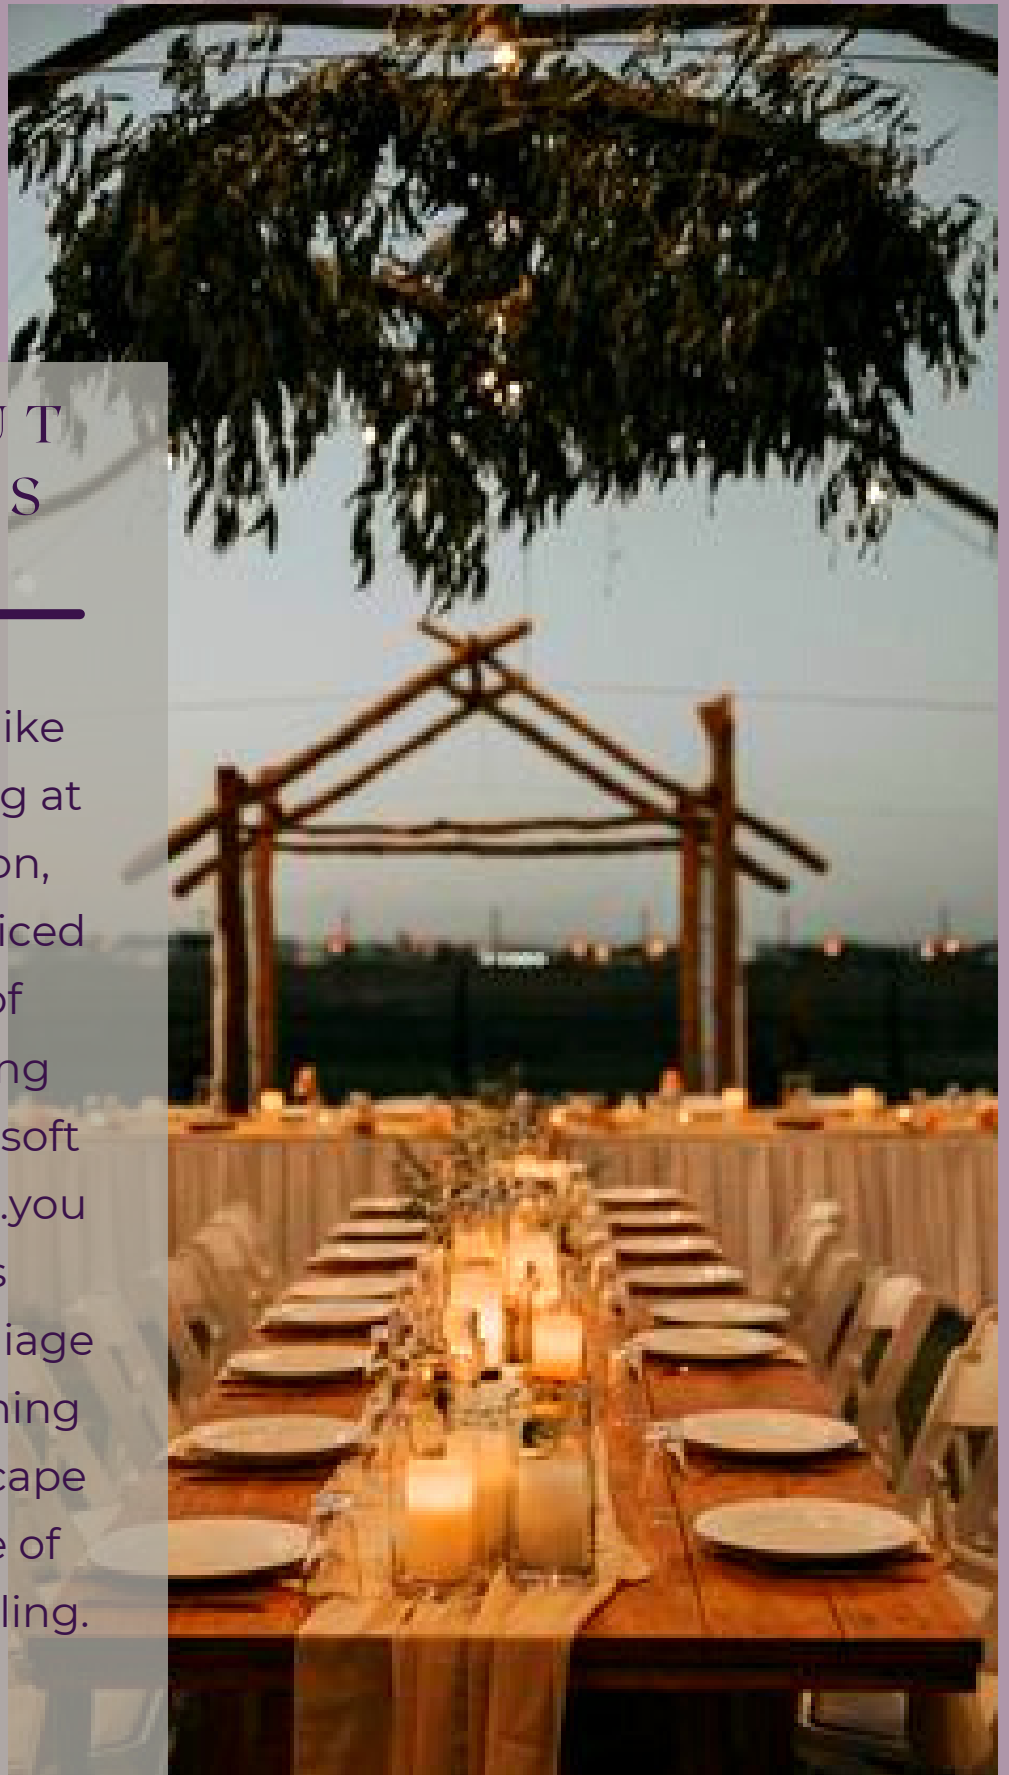

## INSIDE OUT WEDDINGS

---

If you're anything like us and adore looking at wedding inspiration, you would have noticed the latest trend of 'Inside Out' wedding decor! Chandeliers, soft furnishings, drapes...you name it! There is something about foliage hanging and glistening candles on a tablescape that brings a sense of romance to your styling.

## SIMPLE FAVOURS

---

Extravagant favours are slowly becoming a thing of the past. There is no need to spend lots of time and money on a little gift that will either be never used, or never taken off the table at the end of night. Instead, couples are opting for ideas such as the wedding cookie trend. They can be personalised to suit your wedding design, eaten on the spot easy to take home, and lets face it, who doesn't love a little sweet treat at the end of the night! Especially these ones from Cake Sera Sera!

## HONEYMOON LOCALLY

---

With travel being an unsure thing, many newlyweds have found themselves celebrating their marriage by travelling within their region, rather than risking the dreaded border closures. No matter where you are in the world, there is always a hidden gem in the region you live in you have not yet discovered. After all, honeymoons are about spending time with your new life partner and celebrating your love.
